NATRA LOKESH

Full-Stack Developer (MERN + Python) | AI Automation Testing | Playwright

+91 7036189451 | natralokesh143@gmail.com | GitHub | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Full-stack developer skilled in React.js, Redux Toolkit, Node.js, Express.js, MongoDB and Python, with hands-on training and multiple deployed production-style projects. Experienced in REST API design, JWT authentication, role-based authorization, Redis-based session handling, and end-to-end e-commerce workflows. Interested in AI automation testing and Playwright-based end-to-end testing, seeking an entry-level opportunity to apply development skills while building practical expertise in test automation.

TECHNICAL SKILLS

- **Frontend:** HTML5, CSS3, JavaScript (ES6+), React.js, Redux Toolkit, Responsive Design
- **Backend:** Node.js, Express.js, REST APIs, Python
- **Database & Backend Services:** MongoDB, Mongoose, Redis, Firebase, Supabase
- **Mobile:** React Native
- **Auth & Security:** JWT, Refresh Tokens, bcrypt, OTP Verification, Role-Based Authorization, Protected Routes, Helmet, Rate Limiting
- **Tools:** Git, GitHub, Postman, VS Code, Vercel

PROJECTS

Full-Stack E-Commerce Platform | *React.js, Redux Toolkit, Node.js, Express.js, MongoDB, JWT, Redis*

Live Demo | Frontend Repo | Backend Repo

- Built a full-stack e-commerce platform covering registration, OTP-verified login, product browsing, cart, wishlist, Buy Now, checkout and order management.
- Designed 15+ REST API endpoints across authentication, products, cart, wishlist, profile and orders using Node.js and Express.js.
- Implemented JWT authentication with refresh tokens, protected routes and role-based authorization for customer and admin access.
- Integrated Cash on Delivery and online payment workflows with backend order/payment handling.
- Strengthened security with bcrypt password hashing, input validation, rate limiting, Helmet, and Redis-based token blacklisting to prevent reuse of revoked tokens.

AI Chatbot | *React.js, Node.js, Express.js, REST API Integration*

Live Demo | GitHub

- Built and deployed a conversational AI chatbot with a responsive React front end and an Express-based API layer handling real-time message exchange.
- Structured reusable components and API service handlers to keep the chat interface fast and maintainable.

Expense Tracker Dashboard | *React.js, Context API, Node.js, Express.js, MongoDB*

GitHub

- Built a responsive expense management app with full CRUD operations, search, category filtering and dashboard statistics.
- Developed REST APIs with Node.js and Express.js, using MongoDB for persistent storage and Context API for global state management.

Weather Application | *React.js, JavaScript, Weather API, CSS*

GitHub

- Built a responsive React.js weather app with live API integration and dynamic weather data rendering.

TRAINING & CERTIFICATIONS

- **MERN Full-Stack & Python Full-Stack Development —** Godavari Wave Training Institute (Dec 2025 – Present)
- Intensive hands-on program covering React.js, Redux, Node.js, Express.js, MongoDB, Python full-stack development, and React Navigation; built multiple deployed projects during the training. Python full-stack module completing September 2026.

EDUCATION

· B.Com · Bachelor of Computer Applications · Andhra University (Online Degree, 1st Year)
